What are copyrights?

---

Copyrights define the relationship of the author with his work. Owning a copyright gives the owner the exclusive right to use his work, to decide how to use it, and to derive material benefits from it.

---

# Penalties

---

The consequence of the theft of photos -

Misappropriation of authorship and deliberate misrepresentation when talking about the author of a graphic or photo is punishable by a fine. It may even result in imprisonment of up to 3 years.

The theft of photos by competitors is associated with the payment of compensation.

Acts enable us to obtain settlements:

- compensation for the damage caused on general terms or by payment
  - abandonment of the infringement
  - removal of the effects of property infringement
  - releases obtained
-

License

---

Exceeding the rights to the song is another symptom of theft.

The rights buyer may not use photos as advertising material if we have granted a license to use our photo on, for example, the cover of a book.

---

Photo Bank

---

There are many portals on the web that offer access to free photos. The basis for using the photography available in the free photo banks is a license.

violation of its principles is related to the illegal use of photographic works. By using portals that offer free access to photos, you may risk that the portal itself uses them illegally. That is why it is worth using reputable "stock" banks with photos.

If we use photos posted on social media, we should ensure that we obtain the appropriate consent from the author of the photos

---

Author's  
consent

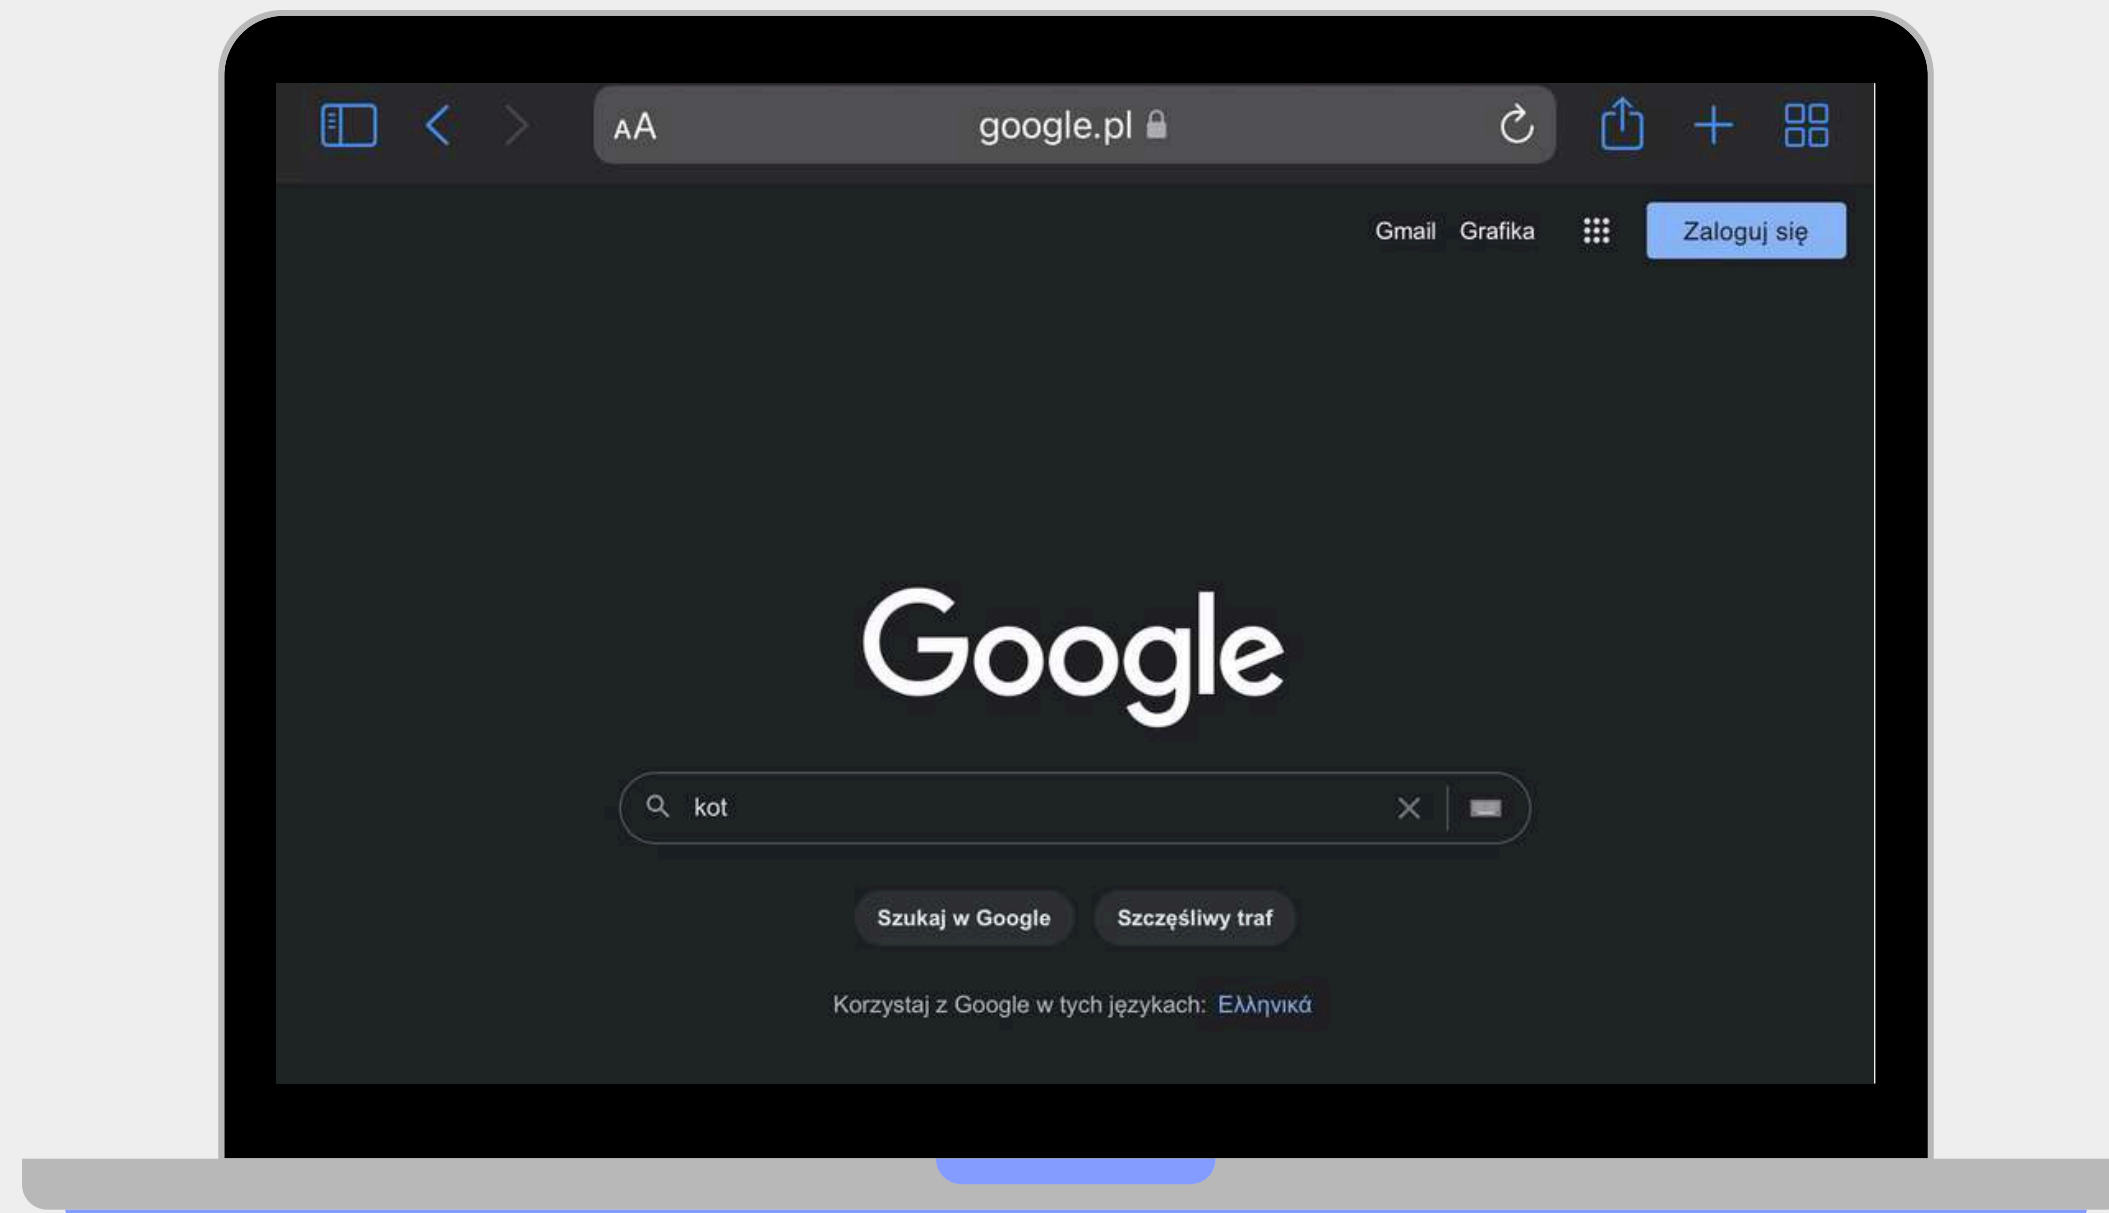

---

It is estimated that Internet users add several hundred million photos to the network daily. In the vast majority of cases, they are available for viewing by any user of the network. So, is publishing photos on the Internet without any restrictions on the availability of such a work tantamount to consenting to the use of this photo by other entities? Of course not. The author of the photos does not authorize anyone to use his work. It does not grant a license, and even less does not transfer economic copyrights to anyone. Not every photo will be a work, and therefore an object protected by copyright.

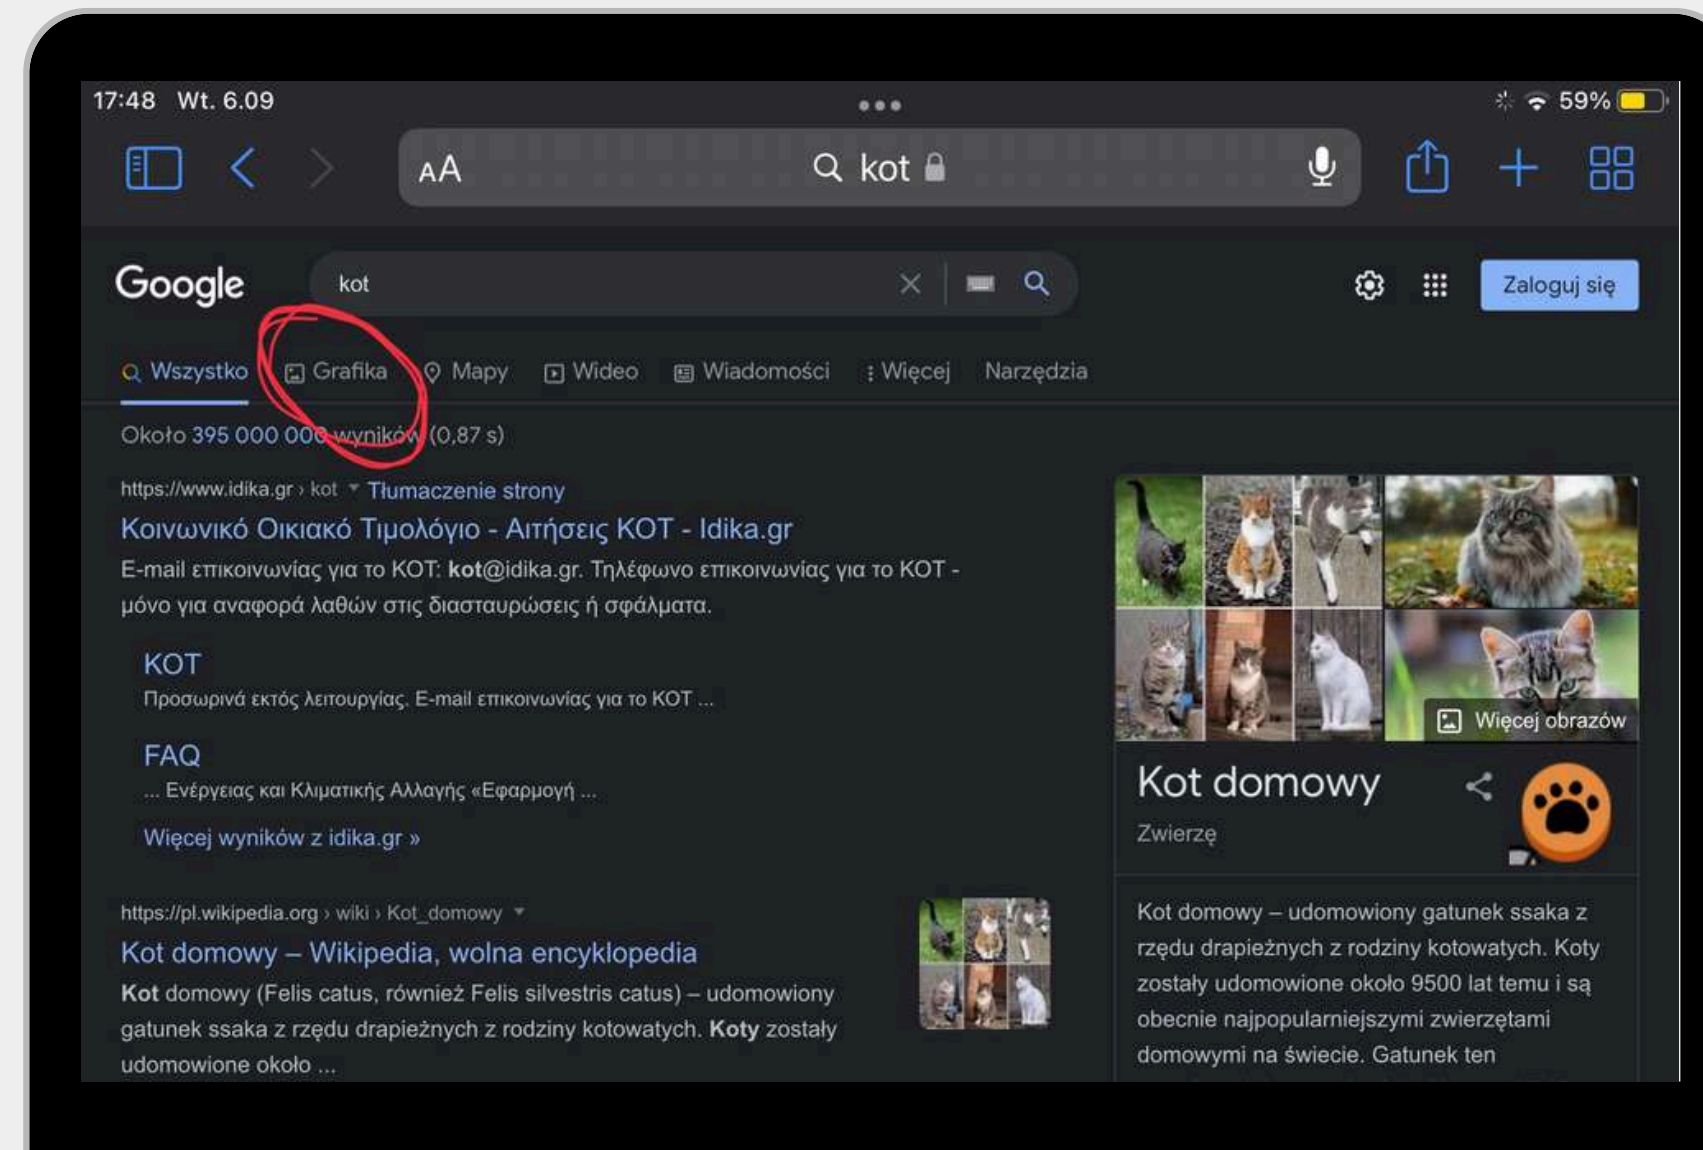

---

How to legally download  
photos from Google?

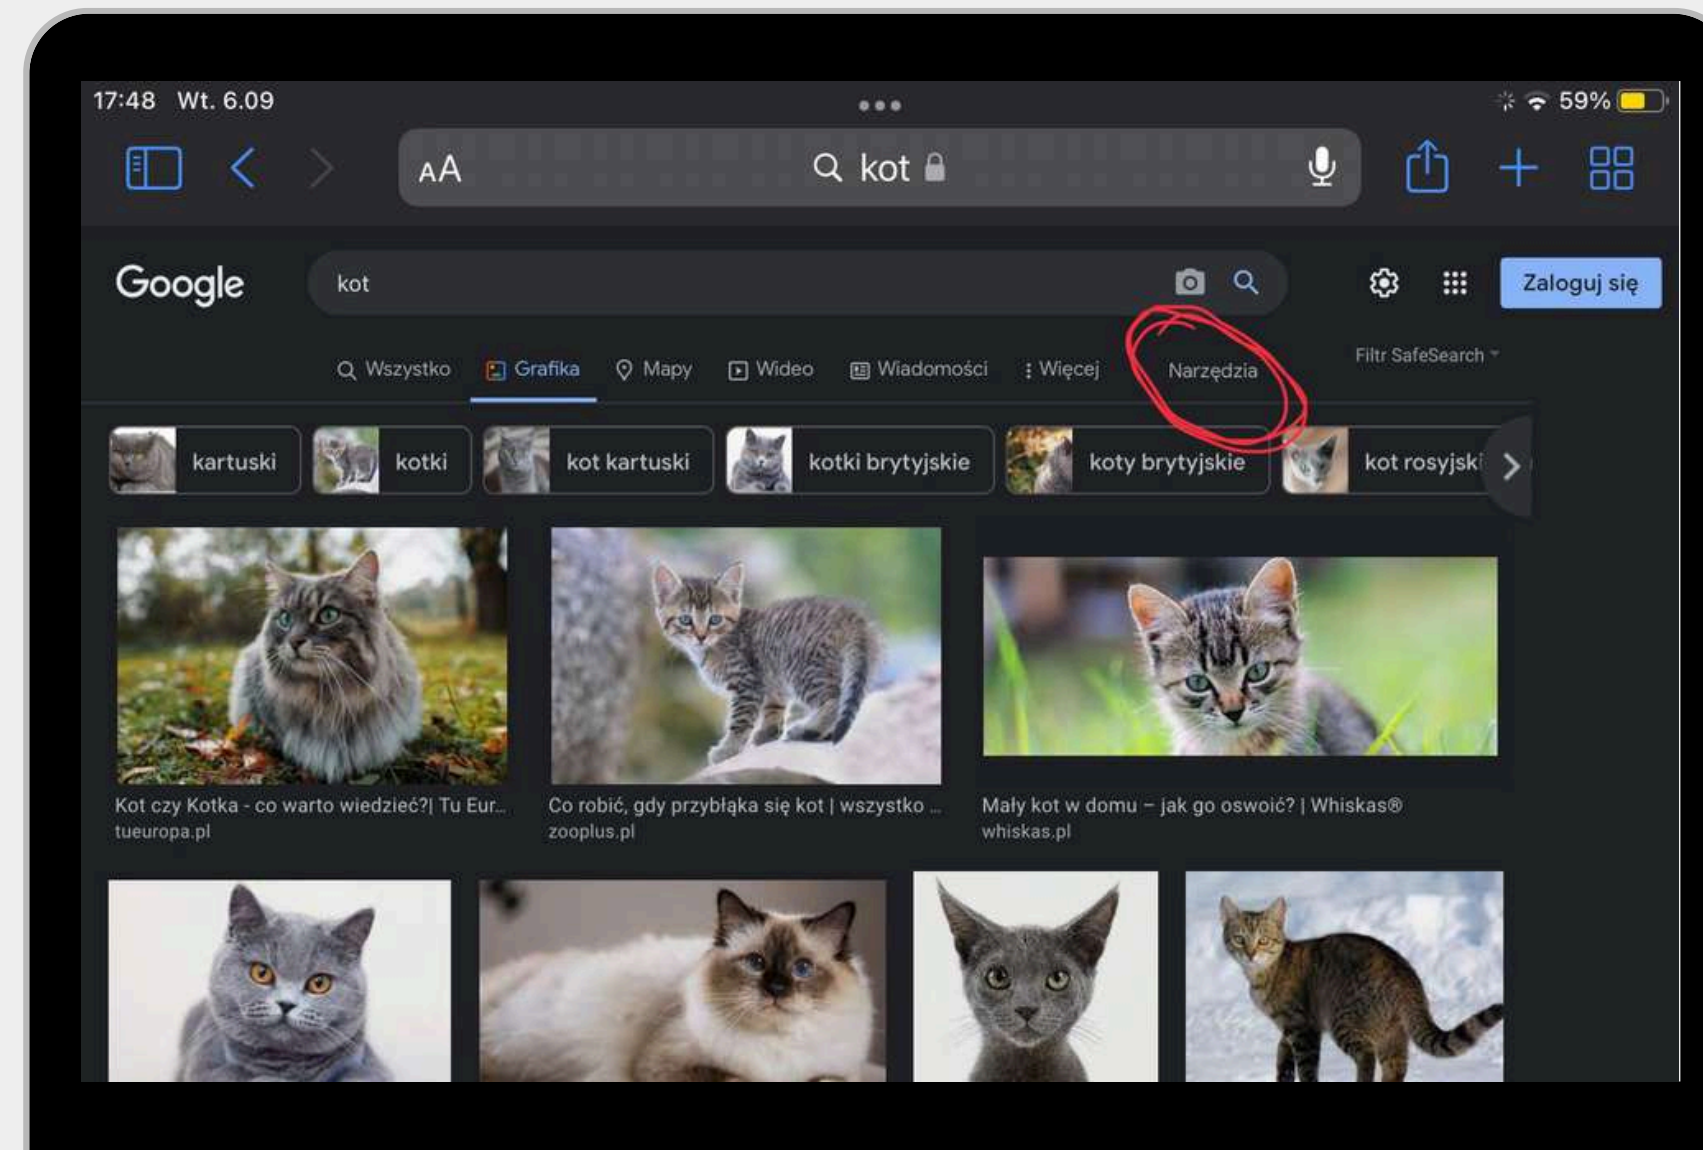

We enter the phrase that interests us

# We enter Google graphics

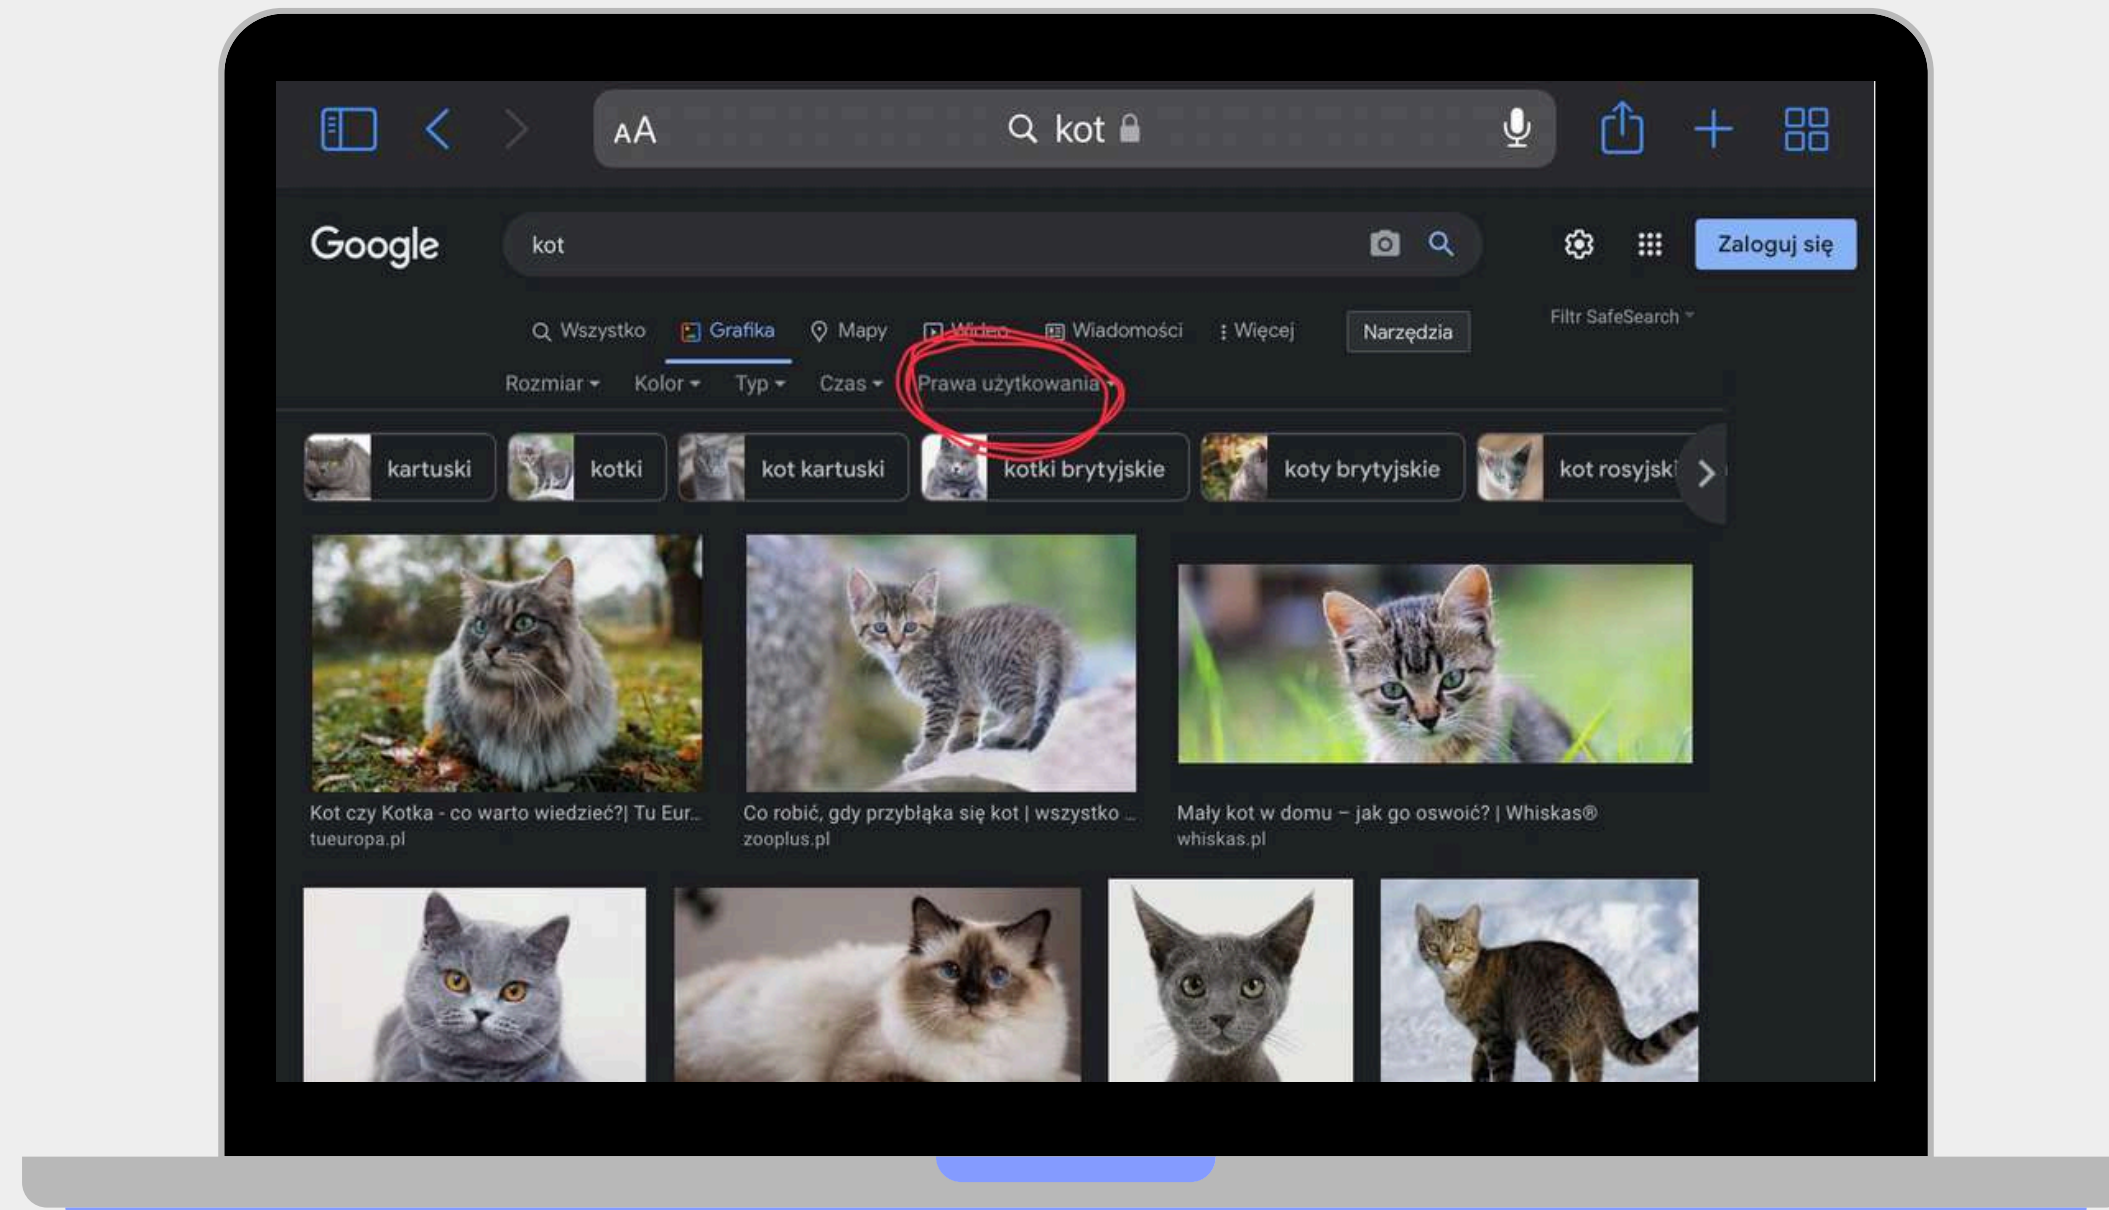

# We are looking for tools

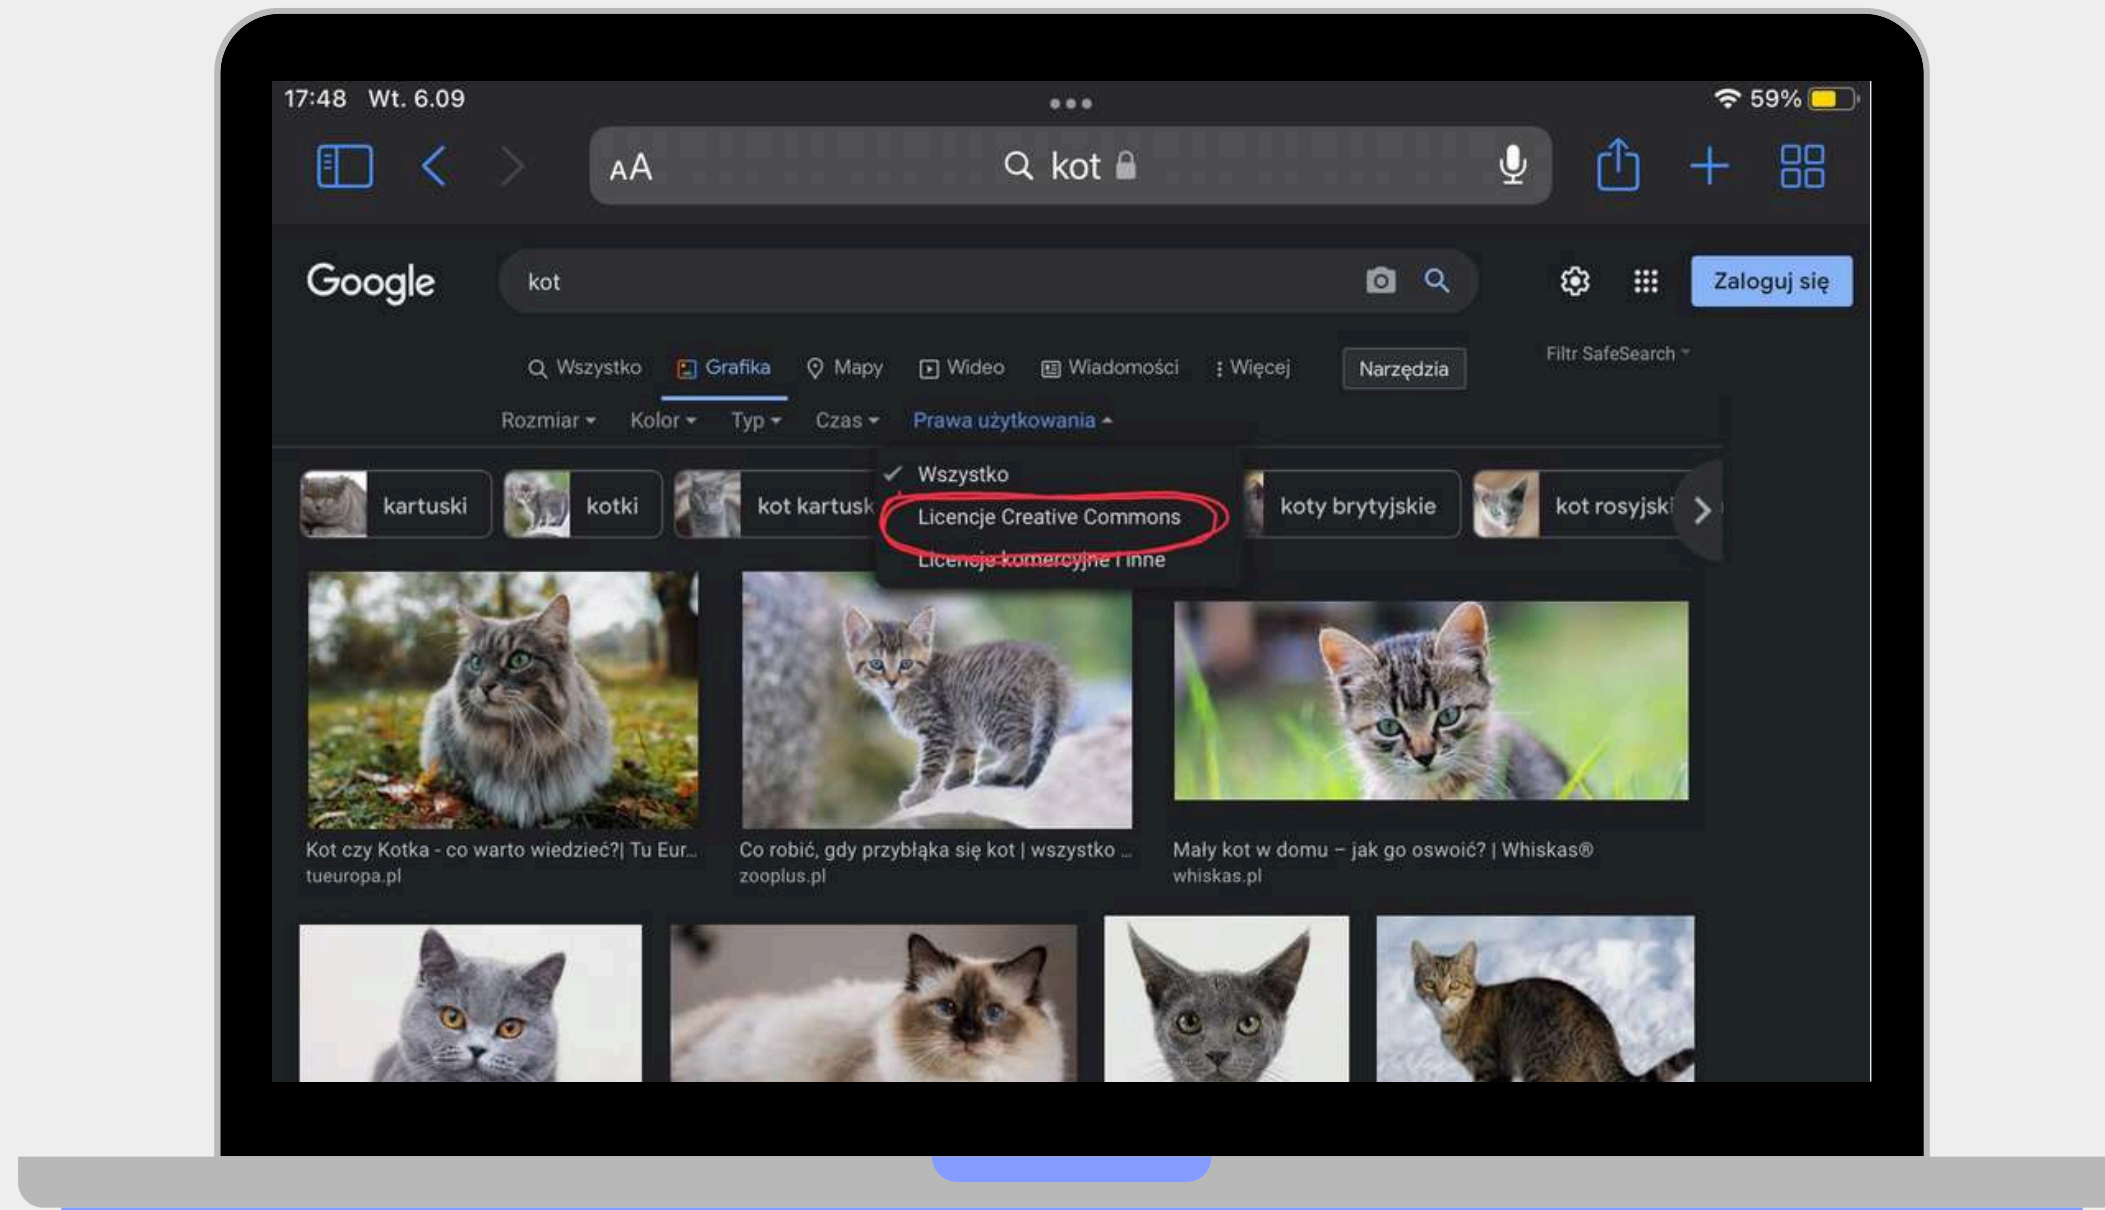

# We enter the rights of use

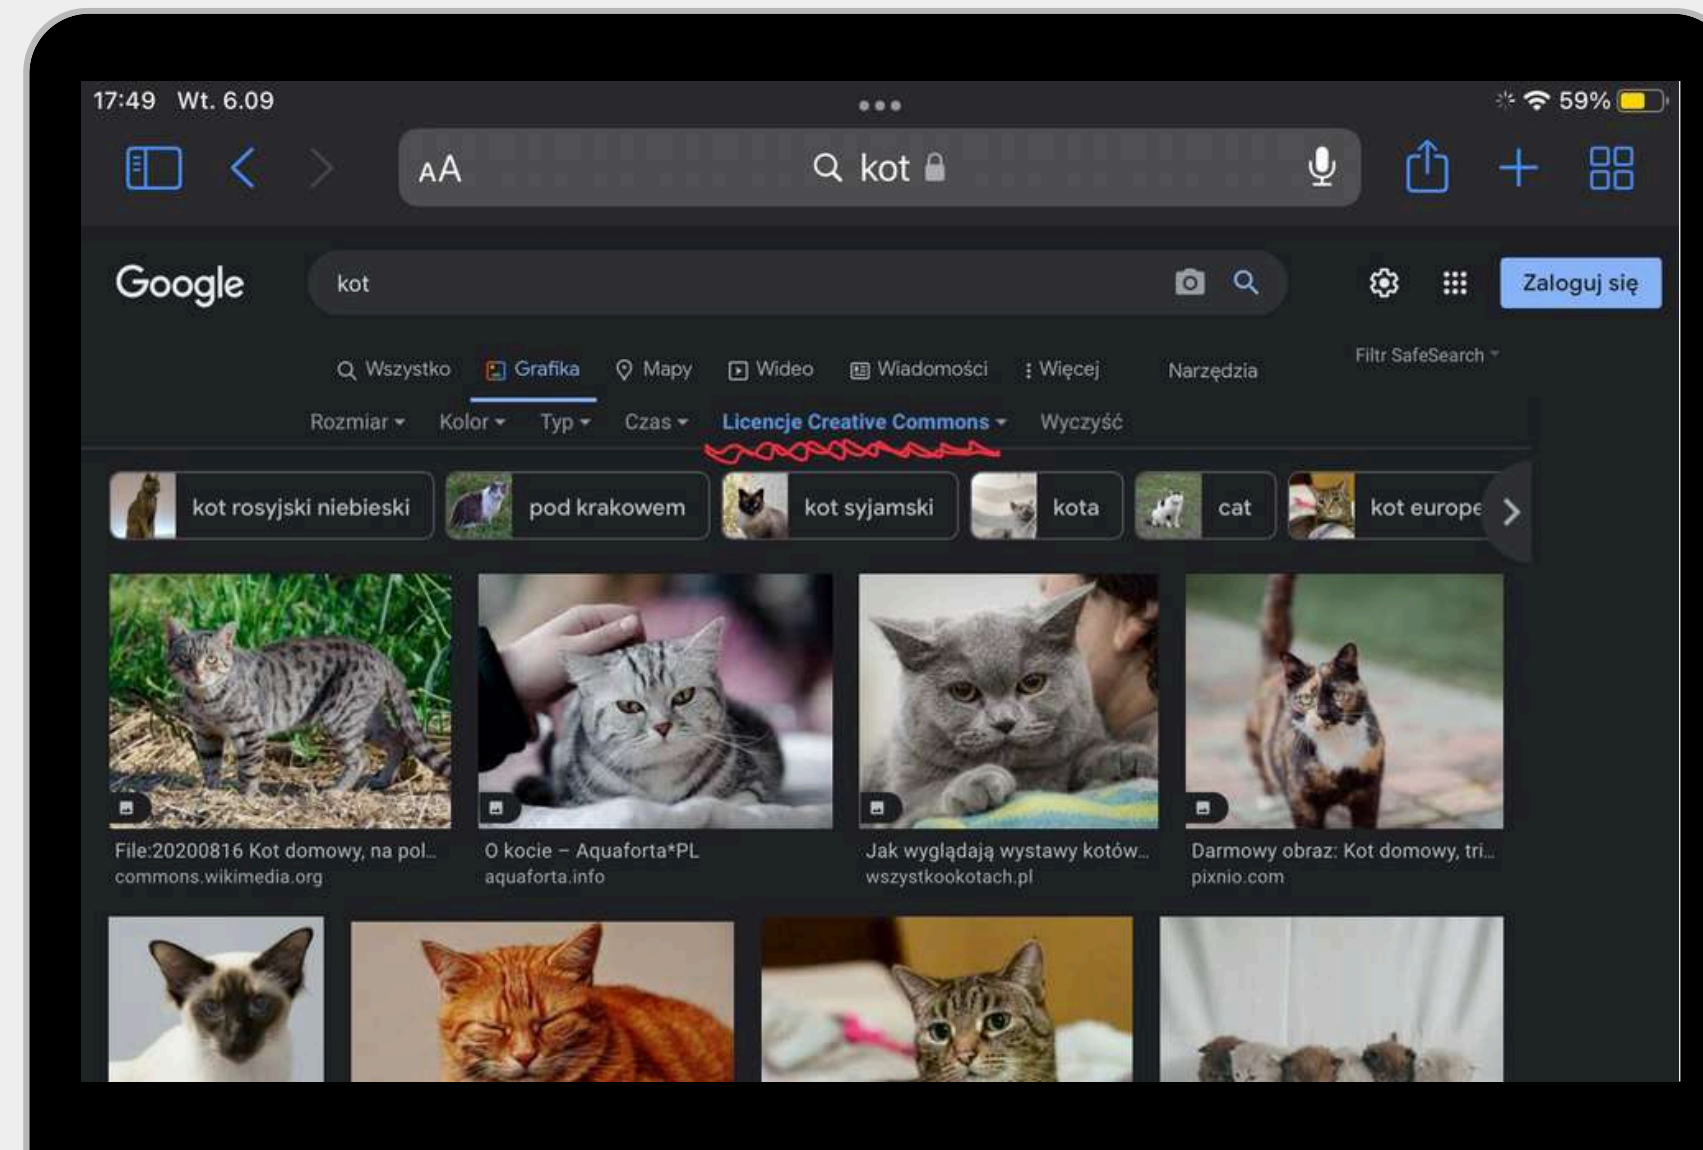

# Click "Licencje Creative Commons"

We can legally use all the photos displayed

**Thank you!**
